Wealthy To Reap Rewards from ACA Repeal

The Fifth Circuit Court of Appeals will soon rule on *Texas v. United States*, a lawsuit brought by 18 Republican Attorneys General and Governors to eliminate the Affordable Care Act. If the Trump Administration and Republicans succeed, health care for millions of Americans would be at risk.

If the entire ACA is repealed, Republicans will eliminate protections for people with pre-existing conditions, take health insurance away from more than 20 million Americans, and weaken employer-based coverage.

ACA repeal would take health care away from millions of Americans. To add insult to injury, the wealthy get another huge tax giveaway!

Households with incomes over \$250,000 would receive tax cuts worth about \$45 billion per year if the ACA were repealed.

The wealthier you are, the more you benefit. The **1,400 wealthiest American households would receive a tax cut totaling \$3.8 billion.**

Corporations stand to benefit, too. **Pharmaceutical companies would pay \$2.8 billion less in taxes each year**, while seniors would pay billions more for prescription drugs.¹

Time and again, Mitch McConnell and his Republican colleagues have chosen to side with the wealthy and corporations.

Democrats choose to fight for working people every day!
