SPECIAL REPORT: How the Trump Administration and Senate Republicans are Responsible for Trump Administration Dysfunction

Trump Administration Clouded by Firings and Resignations. At the highest levels, the Trump administration has been derailed thanks to firings and resignations in the wake of scandals and infighting. An [NPR study](#) found that the Trump administration has had the most Cabinet turnover in more than 100 years.

Nominations Withdrawn or Defeated for Radical Views, Absence of Qualifications, and Lack of Bipartisan Support. Many nominees to high-ranking executive branch positions have been forced to withdraw once their past controversies have come to light. Some of President Trump's judicial nominees have been forced to withdraw due to a clear lack of qualifications. Since the start of his administration, 28 of President Trump's nominations have been withdrawn.

Even Republican Senators Have Blocked Unqualified and Radical Trump Nominees. 22 Republican senators have either placed holds on or threatened to hold up Trump nominees. This includes Republican Whip John Cornyn (R-TX), NRSC Chairman Cory Gardner (R-CO), and several Republican committee chairs.

Republican-Led Senate Committees are Slow-Walking Nominees. 165 nominations currently await action by Republican-led committees in the Senate.

Crucial Positions Across the Government Lack Nominees. The Trump administration has failed to submit nominees to hundreds of key positions. The Presidential Personnel Office has been reportedly [hindered](#) by "inexperience and a shortage of staff." And U.S. commanders have [warned](#) that White House chaos is undermining US efforts to fight ISIS.
